- Clonezilla

Añadimos la ISO de clonezilla y un disco nuevo

Formateamos el disco añadido anteriormente con el gparted.

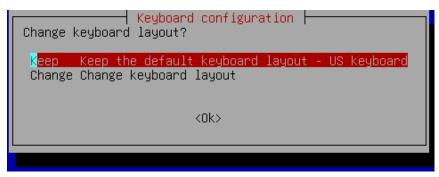

Seleccionamos la primera opción clonezilla live.

Idioma por defecto.

3

Teclado por defecto.

Elegimos la opción disco a disco, ya que clonaremos de un disco a otro.

```
Clonezilla - Opensource Clone System (OCS)

Choose the mode to run the following wizard about advanced parameters:

Beginner Beginner mode: Accept the default options

Expert Expert mode: Choose your own options

Exit Exit. Enter command line prompt

<Ok>

Cancel>
```

Modo beginner.

Seleccionamos que queremos clonar todo el disco y no una partición.

```
Clonezilla - Opensource Clone System (OCS) | Mode: disk_to_local_disk |
Choose local disk as source.
The disk name is the device name in GNU/Linux. The first disk in the system is "hda" or "sda", the 2nd disk is "hdb" or "sdb"...

<Cancel>
```

Seleccionamos el disco que queremos clonar.

```
| Clonezilla - Opensource Clone System (OCS) | Mode: disk_to_local_disk |
Choose local disk as target (ALL DATA ON THE ENTIRE DISK WILL BE LOST AND REPLACED!!)
The disk name is the device name in GNU/Linux. The first disk in the system is "hda" or "sda",
the 2nd disk is "hdb" or "sdb"...

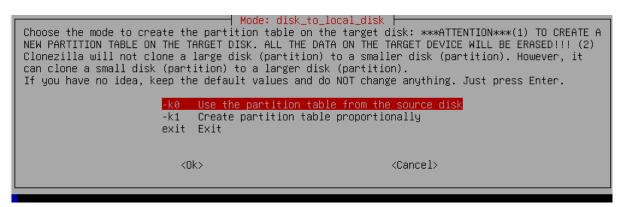

| Sdb 53.7GB_VBOX_HARDDISK__pci-0000_00_0d_0-ata-2_0_VB22e441ac-27e4835f
| Cancel>
```

Seleccionamos el disco que va a ser clonado.

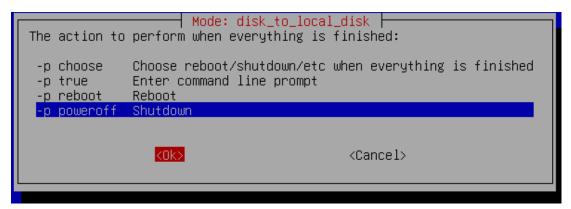

No haremos comprobaciones ni reparación alguna.

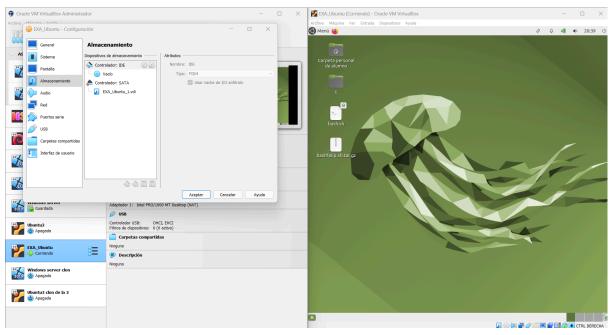

4

Esta opción copiará la tabla de particiones exacta del disco de origen al disco de destino. Esto significa que las particiones en el disco de destino tendrán exactamente el mismo tamaño que las del disco de origen.

La máquina se apagará al hacerse la copia completa.

Por último quitaremos el disco duro original de la máquina y la ISO de clonezilla y comprobamos que la máquina arranca correctamente.
